## MEET ADA LOVELACE

English. 10 December 1815 – 27 November 1852

A woman of fierce originality and intellectual interests, Ada Lovelace is recognized today as the first computer programmer. Born in London in 1815, she studied math and science despite the discouragement from society for a woman to be educated. Steeped in the tradition of Ada's England, this gin honors the botanical bill of a London dry. Created with a dry martini in mind, incorporating both Old and New world botanicals and distillation techniques to produce a uniquely Californian gin.

## THE BOTANICALS

Crafted with a Code of 10 Botanicals, our distiller describes our gin as "an orchestra where every botanical has their voice, but none scream out for attention." Utilizing rose petals and lemon peel from the Coppola family's estate in Napa, we bring both flavor and heritage to this handcrafted gin.

Meyer Lemons from our estate lemon trees. An ode to one of the family's own impressive women, the lemon peels honor Eleanor Coppola's annual tradition of making delicious estate marmalade.

Rose Petals from the many rose gardens on the property.

Italian Blue Juniper tends to be less piney and more floral. This variety is reminiscent of the wild Juniper bushes found on the Coppola family's home in the Italian countryside.

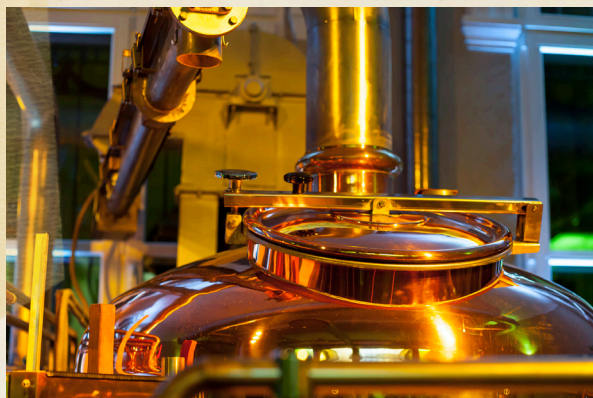

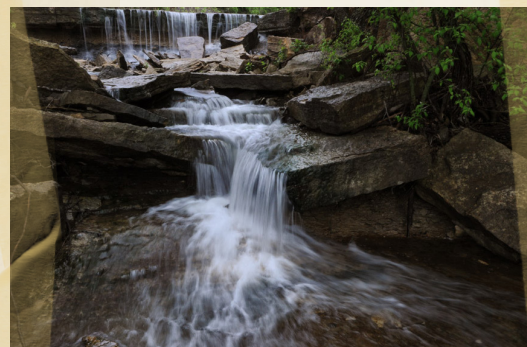

## PRODUCTION PROCESS

Born in Northern California but steeped in the tradition of Ada's England, this gin honors the botanical bill of a London dry while following Ada's lead as a revolutionary in her field, a pusher of boundaries.

Distilled in a custom-designed copper pot still, using varying maceration methods as well as botanical basket extraction, Lovelace Gin is masterfully balanced through the ancient craft of distillation and blending.

Our gin is proofed with Napa Valley spring water from the Coppola family's estate in Rutherford, CA. Situated at the base of Mount St. John, an extinct volcano, the ancient carbon in the soil assists in filtration of many dissolved solids otherwise found in spring water.

## TASTING NOTES

**Nose:** Classic London dry feel with balanced aromas of Italian juniper berries, lavender, summer roses, ripe tangerines and Meyer citrus blossoms.

**Taste:** Full-bodied on entry, mid-palate Turkish delight sweets, orris root and candied ginger finish, balancing floral aromas with earthy Rutherford dust base.
